No more hassle setting rhinestones on the fabric.

Use the patented Glitz up vacuum applicator, the 2 in 1 tool, which makes craft easier to produce!

Features:

- Glitz up vacuum applicator
- 3 sizes of tweezers tip with an absorbing range of 1 mm, 2 mm and 3mm rhinestones
- tool cask
- 12 sorts of rhinestones (in total 1000 pieces)

The help of Glitz up 2 in 1 vacuum applicator brings back the joy of setting hot fix rhinestones! This tool combines two processes in one. No more hassle, setting rhinestones with a tweezers separately on the fabric to glue it afterwards with an applicator. Now this tool hovers the hot fix stones, same as you would do it with a tweezers and heats them up to fix it on the fabric. The advantage in comparison to any other method is:

You don't need further tools anymore! This reliable patented technique is easy to handle. With the right use of this tool you will enjoy quality and its long lasting capability. Depending on your wish, you can regulate the vacuum pump and the heater separately. With the features of 3 different sizes of tweezers tips in this package you are be able to use all hot fix stones in a diameter size of above 1,5 mm.

Instruction:

1. Switch on the power supply by turning on the heat regulator; please start the warming up phase on its lowest level for about 5 minutes.
2. Switch on the vacuum pump. By closing a finger over the air hole, the hot fix rhinestones will be lifted up on the tweezers tip. Be aware that the shiny surface of the rhinestone must be sucked, whilst the gluing side is on the bottom between the fabric and the vacuum applicator.
3. Place the stone on the area you like. Open the air hole by lifting your finger, whilst pressing gently, you will glue the stone on the fabric. Please push steady in an upright position to achieve a good result.

2 in 1

Get it all in one go!

Making craft with rhinestones haven't been easier before,

Attach the rhinestone to the applicator. Please read the instruction on the back side!

Switch on the apparatus by turning the regulators wheel. To warm up the apparatus, please leave the regulator for approx. 2-3 minutes on its lowest level.

To start function of the vacuum pump for lifting up the rhinestones, you simply switch on the button.

To lift up the rhinestone, you simply use the applicator handle, to produce the necessary vacuum.

Place and press the rhinestone gently on the area you wish. Keep up in this position for seconds until the glue has been melted on the fabric.

After lifting the rhinestone, you may now go on with setting the next rhinestone.
